Soft Skills: Team Leadership, Time Management, Adaptable to any environment, Cross functional coordination

EXPERIENCE

SalesCode.Ai

Technical Project Associate   **Jan 2025 - Present**

This role primarily focuses on **Backend Development,** involving data integration and automation:
- Worked with Java and SQL to develop transformers for processing and integrating client data with business logic.
- Designed and implemented tasks to manipulate existing data based on client-specific requirements.
- Gained experience with Kafka Streams to support real-time data processing.
- Built automated jobs to ensure a seamless flow of data into internal databases and Monitored and analyzed AWS logs to maintain system reliability and performance.

Technical Project Trainee   **Sep 2024 - Dec 2024**

- Gained hands-on experience in Java, SQL, and Kafka Streams for data integration and processing.
- Developed transformers for client data, created tasks for data manipulation, and assisted in automated job creation.
- Monitored AWS logs to understand system performance and reliability.

Software Test Engineer Trainee   **July 2024 - Aug 2024**

- Assisted in Flutter Automation to ensure the functionality and performance of the company's application.
- Conducted API Automation and Security Automation to enhance testing efficiency and reliability.
- Performed manual testing, authored comprehensive test cases, and documented defects using JIRA for issue tracking and resolution.

PROJECTS

MARKET MATE - An Ecommerce Website
- Market Mate is an ultimate online shopping MERN Stack Project, seamlessly blending cutting-edge technology with user-friendly design.
- Market Mate offers a dynamic platform for both admin and users to explore a vast array of products.
- Tools Used: MERN Stack (ReactJS, NodeJS, Express, MongoDB, HTML, CSS).

BUDGET BUDDY - A Financial Management Portal
- Budget Buddy is a financial management portal which helps user to keep a record of their income, expenses and all other transactions.. All the data of user and transaction is stored in MongoDB
- Tools Used: MERN Stack (ReactJS, NodeJS, Express, MongoDB, HTML, CSS).

HealthHub - HealthCenter
- Health Hub is a Health center project where people can explore a wealth of information on various aspects of health and well-being.
- I worked on this project during Hack The Mountains 4.0 with my Team TechPhoenix
- Tools Used: HTML, CSS, JavaScript

EDUCATION
